

# Physical Medicine of Oklahoma

Hello patients,

According to the federal government only “essential” businesses will remain open due to COVID-19. The CDC guidelines state that healthcare, food supply, and pharmaceutical services continue normal work schedules. Physical Medicine of Oklahoma falls into the category of healthcare services. Our number one goal is to help our patients and keep you, as well as our employees in the office, healthy and safe. We still want to provide for our patients therefore we have decided to remain open until otherwise instructed to close our doors. We are taking careful precautions in the office daily to keep the office environment as sanitized and safe as possible.

## **Ways we are staying protected**

- **We currently have no confirmed cases of COVID-19 in our office**
- **We are checking staff temperatures prior to shift to determine if anyone is getting sick**
- **Wash your hands before entering the facility and refrain from touching eyes, mouth, and nose**
- **Limit the number of people in an area at once**
- **Keep a good distance away from others**
- **Taking all employees temperatures before they come into work**
- **Cleaning chairs, phones, keyboards, all touchable surfaces daily**
- **Cancelling appointments if you have recently travelled, feel sick, have been around someone who is sick or have a weak immune system**

Here at Physical Medicine of Oklahoma we value our employees and patient’s health and safety, we just want to remind everyone that our office will continue providing the best service possible.
